As a over the road truck driver. I wish to say how much the traffic channels that XM radio has. It is very helpful in the major cities that I travel. It alerts you of where the problems are and how bad they are. This information is helpful to get around the problem. It also has the weather and you can plan ahead to make on time delievery. I understand that The FCC has a problem with at. I pay for this service and like to have more cities coverage that can help many more drivers of trucks and cars . This information can help prevent some of these traffic jams. If you did this for a living it would be understood better. With the new Hours of service . This infor can help to prevent losing time against the 14 hr clock and the limitations that are federal guideline.
